**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 19-39 rejected under 35 U.S.C. 102(e) as being anticipated by Goldberg et al., Patent #6,075,844.

**Regarding claims 19, 28 and 36 Goldberg** teaches a method of handling spoken messages, a message exchange, and computer-readable data carrier connected to a public switched telephone network including a plurality of subscribers comprising:

an address module configured to store a plurality of lists with subscriber identifications, each list being assigned to at least one of the subscribers wherein at least two of the lists include a common group identification (124 fig.1, col.5 lines 32-4, and col.9 lines 5-12)

a receiving module configured to receive a spoken message from one of the subscribers in the telephone network via the telephone network, the one of

Art Unit: 2645

the subscribers being a transmitting subscriber, and to store the spoken message with an identification of the transmitting subscriber(Fig.1, col.4 lines 29-46, and col.5 lines 15-31);

a speech recognition module configured to enable the transmitting subscriber to designate by means of spoken language at least one of the other subscribers as an addressee to whom the spoken message is addressed (Fig.1,col.3 lines 55-65 and col.4 lines 20-28);

a transmission module configured to enable the transmitting subscriber to designate by means of spoken language at least one of the other subscribers as an addressee to whom the spoken message is addressed(Fig.1,col.3 lines 55-65 and col.4 lines 20-28);

a transmission module configured to transmit the stored message by means of an automatic call to the addressee(col.5 lines 32-40), and to inquiry if a reply is to be sent from the addressee to the transmitting subscriber and a reply module configured to receive and to store the reply from the addressee(fig.1, col.4 lines 51-54 and col.7 lines 1-28).

Regarding claim 20, Goldberg teaches the message exchange according to claim 19, wherein the speech recognition module is configured to enable the transmitting subscriber to create and administer the at least one of the lists by means of spoken language (col.3 lines 55-65).

Art Unit: 2645

Regarding claim 21, Goldberg teaches the message exchange according to claim 19, wherein each subscriber identification includes a name of the one of the subscribers(col.4 lines 20-28).

Regarding claim 22, Goldberg teaches the message exchange according to claim wherein each subscriber identification includes a call number of the one of the subscribers(col.4 lines 29-46).

Regarding claim 23, Goldberg teaches the message exchange according to claim wherein at least one of the subscriber identifications are stored as a voice signal(col.4 lines 20-28).

Regarding claim 24, Goldberg teaches the message exchange according to claim further comprising at least one tariff table, wherein the transmission module refers to the at least one tariff table to transmit messages at times having economical tariffs(Fig. 1 and col.4 lines 15-65).

Regarding claim 25, Goldberg teaches the message exchange according to claim further comprising:

a table with statistical information on the traffic load in the telephone network, wherein the transmission module refers to the table to transmit messages at times of low traffic load(Fig. 1 and col.4 lines 15-65).

Regarding claim 26, Goldberg teaches the message exchange according to claim 19 wherein the reply module is configured to receive a reply from the addressee, and to store and transmit the reply to at least the transmitting subscriber(col.7 lines 1-29).

Art Unit: 2645

Regarding claim 27, Goldberg teaches the message exchange according claim 19, wherein at least one of the lists contains access rights(120 Fig.1).

Regarding claim 29, Goldberg teaches the method according to claim 28, wherein at least one of the subscriber identifications are stored as a voice signal(col.4 lines 20-28).

Regarding claim 30, Goldberg teaches the method according to Claim 28 further comprising: storing status information concerning the transmission of the spoken message to the addressee: and retransmitting the spoken message if it is not successfully transmitted during a first attempt(col.7-col.8).

Regarding claim 31, Goldberg teaches the method according to claim 28, further comprising monitoring at least one tariff table; and transmitting the spoken message at economical tariff times time based on monitoring of the at least one tariff table(Fig. 1 and col.4 lines 15-65).

Regarding claim 32, Goldberg teaches the method according to claim 36 further comprising: storing statistical information on a traffic load in the telephone network in a table and transmitting the spoken message at a time of low traffic load based on the stored statistical information(Fig. 1 and col.4 lines 15-65).

Regarding claim 33 Goldberg teaches the The method according to claim further comprising transmitting the spoken message via the Internet(col.9 lines 13-28).

Regarding claim 34, Goldberg teaches the method according to claim 28 further comprising: receiving the reply from the addressee; storing the reply in the message exchange and transmitting the reply to at least the transmitting subscriber(col.7 lines 1-65).

Art Unit: 2645

Regarding claim 35, Goldberg teaches the method according to claim 28, wherein the transmitting subscriber administers at least one of the lists by means of spoken language(col.3 lines 55-65).

Regarding claim 37, Goldberg teaches the message exchange of claim 19, wherein the addressee is a group of the subscribers associated with the common group identification(col.9 lines 5-12)

Regarding claim 38, Goldberg teaches the method of claim 28, wherein the addressee is a group of the subscribers associated with the common group identification(col.9 lines 5-12).

Regarding claim 39, Goldberg teaches the computer-readable data carrier of claim 36, wherein when the addressee is a group of the subscribers, each of the lists associated with individual subscribers of the group includes the common group identification(col.9 lines 5-12).

### ***Response to Arguments***

2. Applicant's arguments with respect to claims 1-39 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 2645

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
